Patients find Pro-Flex bruxism and TMJ splints comfortable and easy to wear!

PRO-FLEX[®]

BRUXISM AND TMJ SPLINTS

THE UNIQUE THERMO-PLASTIC SPLINT MATERIAL SOFTENS IN WARM WATER TO PROVIDE EXCELLENT FIT AND COMFORT.

PRO-FLEX

Combines the benefits of a hard splint with those of a soft splint.

- ▶ **EXCELLENT FIT** – the thermo-plastic acrylic softens in warm water to adapt to the teeth.
- ▶ **ADJUSTABLE** – adjustments are done easily with conventional acrylic burs.
- ▶ **RETENTIVE** – the flexible acrylic adapts over the height of contour into the undercut areas.
- ▶ **DURABLE** – made of high strength heat cured ethyl-methacrylate acrylic.
- ▶ **COMFORTABLE** – the thermo-plastic effect allows the splint to flex and seat for greater patient comfort.
