

PROTEC THOSE SMILES WITH

safe-t-flex™

ATHLETIC MOUTHGUARDS

CUSTOM MADE OF
MULTI-LAYERED PRESSURE
LAMINATED VINYL TO PROTECT AGAINST INJURY AND CONCUSSION.

SAFE-T-FLEX

Athletic mouthguards provide protection, speech, comfort and oxygen uptake for contact sports.

- ▶ **PROTECTION** – laminated vinyl offers superior strength to protect against injury and concussion.
- ▶ **COMFORT** – custom molded for improved comfort and retention.
- ▶ **SPEECH** – minimum palatal thickness for excellent speech and communication.
- ▶ **OXYGEN UPTAKE** – custom fit for greater oxygen uptake and higher performance.

safe-t-flex™

ATHLETIC MOUTHGUARDS

MATERIAL TYPES

- ▶ **SAFE-T-FLEX LIGHT**
1 layer of laminated eva material with a thickness of 3mm. Designed for reduced bulk and moderate protection in all sports.

- ▶ **SAFE-T-FLEX STANDARD**
2 layers of laminated eva material with a thickness of 4mm. Fabricated for contact sports.

- ▶ **SAFE-T-FLEX HEAVY**
2 layers of laminated eva and 1 layer of hard polycarbonate materials with a thickness of 5mm. Specially designed for heavy contact sports.

TRIMMING SPECIFICATIONS

- ▶ **STANDARD TRIM**
Covers the upper arch only to allow excellent speech and comfort.

- ▶ **“BOXING” MOUTHGUARD**
Extends from upper arch to include lower anterior teeth. Available in Safe-t-Flex Standard only.

- ▶ **“ORTHODONTIC”**
Includes coverage of all teeth to protect tissues against braces. Available in Safe-t-Flex Standard only.
