

Snoring & Sleep Apnea Appliance

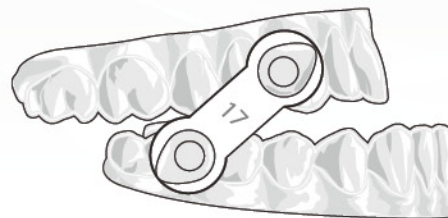

ELASTIC MANDIBULAR ADVANCEMENT

Upper and lower acrylic splints with interchangeable elastic straps open the bite and permit the adjustment of mandibular position to fit the patient's individual needs. Elastic Mandibular Advancement appliance offers treatment of snoring & sleep apnea by re-opening the air flow through the oral pharynx.

NON-INVASIVE - minimal bulk designed for maximum tongue space

COMFORTABLE - vacuformed thin clear acrylic splints and flexible elastic straps

ADJUSTABLE - select elastic straps from a variety of lengths and firmness

Elastic Strap Specifications	13mm	15mm	17mm	19mm	21mm
White (Soft Pull)					
Yellow (Medium Pull)					
Blue (Firm Pull)
